EDUCATION

The University of Texas at Arlington | M.S., Computer Science - **4.0 GPA** **Jan 2024 – Dec 2025**
Design and Analysis of Algorithms, Data Analysis and Modelling Techniques, Database Systems, Data Mining, Cloud Computing and Big Data, Software Engineering, Machine Learning, Artificial Intelligence.

Savitribai Phule Pune University | B.E., Information Technology – **3.7 GPA** **Aug 2017 – Jul 2021**
Data Structures and Algorithms, DBMS, Software Engineering, Cloud Computing, Operating Systems, Data Science & Big Data Analytics, Machine Learning, Object Oriented Programming, Distributed Systems.

PROFESSIONAL EXPERIENCE

PAYCOM – Software Developer Intern, TX, USA **May 2025 – Present**

- Developed and maintained a full-stack analytics dashboard using React, Next.js, and Node.js, enabling real-time data visualization and insights.
- Designed and integrated RESTful APIs and database schemas in MySQL, ensuring efficient data retrieval and optimized backend performance.
- Implemented TypeScript for enhanced code quality and reliability, reducing runtime errors and improving maintainability across the codebase.
- Collaborated with cross-functional teams to gather requirements, deploy new features, and deliver intuitive user experience, improving user engagement.

UTA Office of Information Technology – Web Developer, TX, USA **Oct 2024 – May 2025**

- Built and maintained modular components in Sitecore CMS using Razor, HTML/CSS, and C#, ensuring WCAG compliance
- Managed and customized CampusPress sites, including themes, plugins, and PHP/JS tweaks
- Utilized ServiceNow to manage ITSM workflows, handle incident and request tickets, and support process automation
- Conducted content audits and SEO improvements using metadata standards, schema markup, and analytics tools

ENCORA INC. – Business Intelligence Developer, PUNE, IN **Mar 2023 – Jan 2024**

- Led the development and maintenance of complex data models and ETL processes, optimizing data organization and retrieval. Used advanced techniques to uphold data integrity.
- Successfully implemented a suite of six industry-leading tools for Business Intelligence and Data Engineering - Snowflake, Looker Snap Logic, Symmetric DS, Ansible and JIRA resulting in improvement in data operations efficiency.
- Leveraged the latest BI trends to optimize queries, leading to a significant improvement in performance and delivering actionable insights that enhanced data-driven decision-making and strategic planning.
- Provided ongoing support to stakeholders, quickly addressing data needs and resolving issues, which augmented the reliability and effectiveness of BI solutions.

ACCENTURE – Application Development Analyst, PUNE, IN **Jul 2021 – Jan 2023**

- Developed comprehensive application solutions to address a variety of operational, data and security challenges. Created robust algorithms and employed best practices.
- Identified and resolved performance bottlenecks, leading to a 25% increase in database performance and a 20% reduction in query execution time.
- Launched an enhanced solution framework that streamlined development processes and amplified team efficiency.
- The revamped framework led to a significant increase in customer satisfaction indicating higher system reliability.

ACADEMIC PROJECT EXPERIENCE

- **Movie Ticket Booking Web Application | MongoDB, ExpressJS, ReactJS NodeJS** - Developed a movie ticket booking application using the MERN stack, achieving a 50% reduction in load times. Integrated secure payment gateways and seat selection features, enhancing user satisfaction by 35%. Optimized database queries, leading to a 20% improvement in transaction processing speed.
- **Feast Hub – Food Delivery Android App | Flutter, Firebase, REST APIs, Third-Party Integrations** - Developed and deployed "Feast HUB," a food delivery app using Flutter and Firebase with over 500, downloads on the Play Store. Integrated third-party APIs for real-time tracking and secure payments, enhancing user experience by 40%. Optimized backend performance by 30% through efficient data handling and modular architecture.
- **Store Inventory Prediction System |Python, Machine Learning, Data Modelling and Data Analysis** - Achieved a 96% accuracy rate in analyzing and forecasting the store's inventory by developing and deploying a machine learning model. Performed Data visualization to understand the trends.

TECHNICAL SKILLS | CERTIFICATIONS

Programming languages: Java, Python, R, JavaScript, HTML, CSS, PHP, React

Tools: Snowflake, Looker, Snap logic, Visual Studio, Microsoft Office Suite, GitHub, Jira, Confluence, ServiceNow, Tableau

Cloud: AWS, Azure Cloud services

Databases: SQL, MySQL, PostgreSQL, MongoDB

Certifications: Microsoft certified Azure AI Fundamentals, META – Data Engineering

AWARDS | RECOGNITION

- Received a fast-track promotion at Accenture based on exceptional performance
- Achieved Dean's List recognition during undergraduate studies for academic excellence.

VOLUNTEER | LEADERSHIP EXPERIENCE

National Service Scheme (NSS - Social Organization) Volunteer.

Technical Event Head – University Fest.

Jul 2018 – Jul 2021

Jul 2019 – Mar 2020
